

HUYNH TRUNG CHIEN

AI Engineer — Agentic AI, RAG & Full-Stack Development

+84 394 394 694 | huynhtrungchienltt@gmail.com | huynhtrungchien.dev | Ho Chi Minh City, Vietnam

CAREER OBJECTIVE

AI Engineer intern specializing in Artificial Intelligence, focused on building complete AI products end-to-end - from data pipelines and model development to full-stack deployment. Motivated by the tangible impact of AI systems that solve real problems, with hands-on experience designing agentic automation systems (LangGraph, MCP), grounded Retrieval-Augmented Generation pipelines, and full-stack cloud applications (SAP BTP, MERN). Committed to growing as a full-stack AI engineer capable of taking ideas from research to production.

EXPERIENCE

AI Engineer Intern – Bosch Global Software Technologies Vietnam (BGSV)

April 2026 – Present

- Designed and built a proof-of-concept **agentic automation system (LangGraph)** with a custom **FastMCP** server and **Selenium**-based browser automation to auto-assign courses on TrainM (Bosch's internal LMS); engineered the agent to parse both light and shadow DOM, reason over page state, and autonomously decide the next action - reducing course assignment to a single course-title prompt.
- Independently developed a **full-stack proof-of-concept application (SAP CAP + React/UI5)** for outsourcing task management (creation, nomination, submission, reward workflows), deployed on **SAP BTP** with Authorization and Trust Management Service and Object Storage, using standalone approuter deployment type.
- Presented progress regularly to mentors, consulted with senior team members on business requirements, and technical directions.
- Stack:** Python, LangGraph, FastMCP, Selenium, uv, SAP CAP, React (TypeScript), UI5, SAP BTP.

EDUCATION

Swinburne University of Technology

January 2024 – September 2026

Bachelor of Computer Science – Artificial Intelligence | GPA: 3.4/4

SKILLS

- AI/ML & Agentic Systems:** LangGraph, MCP (FastMCP), RAG, Prompt Engineering, Model Evaluation, Computer Vision, NLP, LLMs
- Tools:** Git, Jira, Google Colab, Kaggle, uv
- Cloud & Deployment:** SAP BTP, Vercel, Render
- Full-Stack:** React, SAP CAP, UI5, Node.js, MERN stack
- Databases:** MongoDB, PostgreSQL(pgvector), Redis.
- Programming & Frameworks:** Python, TensorFlow, Scikit-learn, FastAPI, JavaScript, Selenium
- Languages:** English - IELTS 7.5 (2023)
- Soft Skills:** Teamwork, Self-study, Problem solving, Critical thinking.

PROJECTS

Personal Tutor AI — Personalized AI Tutoring Platform (Individual project)

May 2026 – Present

- Built a full-stack AI tutoring platform (FastAPI + LangGraph agent) that generates grounded courses, flashcards, and exams from real documents - with citations and independent fact-checking.
- Designed a production-grade RAG pipeline covering document parsing, vision-based enrichment for diagrams and formulas, parent-child chunking, and hybrid retrieval (vector + full-text search) with reranking - enabling accurate grounding across both text-heavy and visually complex subjects.
- Evaluated the RAG pipeline using RAGAS, achieving 0.88 faithfulness, 0.95 context precision, and 0.94 context recall - validating that generated answers are accurately grounded in retrieved source documents.
- Tools:** Python, FastAPI, LangGraph, LlamaParse, Supabase (pgvector), Redis, LangSmith, OpenAI, Crawl4AI, Cohere, Serper | [Github](#)

Attendance Checking System (Individual project)

- Description: Building a attendance checking system with emotion and liveness detection.
 - Data processing workflow for Face Recognition, Emotion Detection, and Anti-Spoofing models.
 - Training from scratch Face Recognition model using metric learning and classification-based approaches.
 - Building a simple UI, integrating all the models, and using FastAPI for the backend to provide a live, end-to-end solution.
- Tools:** Python, FastAPI, Google Colab, Kaggle | [GitHub](#)

ACHIEVEMENTS

- VNPT AI Hackathon – Age of Alnicorns:** Third Prize | [Certificate](#)
- Online Credentials:** [Deep Learning Specialization](#), [Generative AI with LLMs](#), [Mathematics for ML Specialization](#), [Supervised ML: Regression and Classification](#), [Advanced Learning Algorithms](#) (Coursera), [AI Engineer Agentic Track \(Agents & MCP\)](#) (Udemy)
